## intel upgrade graphics card

a Press Windows Key + R, type devmgmt msc b Expand the graphic card, click on the drivers.. The performance of the CPU is a bit limited due to the low clock rate and the missing Turbo Boost and Hyperthreading.. Still the performance per GHz should be a bit better than similar clocked Core 2 Duo, because of the integrated memory controller and small improvements in the core.. Let's try these methods and check if it helps Method 1: Uninstall and reinstall the graphic card drivers from the manufacturer's website. e10c415e6f
